

CPHC Bridge Work

The bridge heading into the CPHC parking lot in Brockville has received an upgrade. The existing stucco was removed and replaced by an aluminum composite cladding. Alpolic composite panels offer a long lasting finish that will stand up to the harsh winters and humid summers.

Fall 2014

with Chevron Construction Services Ltd.

Upper Canada Motor Sales

Eight years after Chevron Construction Services Ltd. completed a major renovation, Upper Canada Motor Sales in Morrisburg has been transformed again. General Motors has decided on a new image they would like their dealerships to have. One of the biggest differences is using Alpolic Metal Composite Panels on the exterior instead of the original acrylic stucco (or EIFS). New signage and other general upgrades were also done.

By 2016, General Motors expects 2500 out of its 3000 Chevrolet dealerships to be upgraded.

Alpolic Metal Composite Panels

Alpolic metal composite panels offer the rigidity of heavy-gauge sheet metal in a lightweight composite material. They provide excellent flexibility and form adhesion for forming and offer superior resistance to humidity, impact, salt spray, pollution and abrasion. This makes them an ideal product in our climate. They can be used for exterior as well as interior applications. There are many different finishes to choose from ranging from traditional muted colours to newer, bright colours, natural metals like copper and stainless and even finishes resembling wood.

Chevron Construction Services Ltd. recently completed two projects using Alpolic panels - the bridge at CPHC in Brockville and Upper Canada Motors in Morrisburg.

For more information on how Alpolic metal composite panels can be used at your business please call our office at (613) 926-0690.

Dock Levelers

Dock levelers help bridge the gap between docks, trailers, cargo trailers and railroad cars for quicker, easier and safer loading and unloading. It provides a smooth transition for pallet trucks, hand trucks, carts, two-wheelers and forklifts.

Chevron Construction Services Ltd. recently completed a dock leveler at an industrial plant in Kingston.

Safety First

Health and Safety Awareness Training

Now that the July 1, 2014 deadline has passed, every worker in Ontario should have completed the mandatory Health and Safety Awareness Training. Here is a summary of key facts everyone needs to know:

Workers have the right to:

- Know about workplace hazards and what to do about them.
- Participate in solving workplace health and safety problems.
- Refuse work they believe is unsafe.

Workers must:

- Follow the law and workplace health and safety policies and procedures.
- Wear and use the protective equipment required by their employer.
- Work and act in a way that won't hurt themselves or anyone else.
- Report any hazards or injuries to their supervisor.

Employers must NOT take action against workers for following the law and raising health and safety concerns.

Employers must:

- Make sure workers know about hazards and dangers by providing information, instruction and supervision on how to work safely.
- Make sure supervisors know what is required to protect workers' health and safety on the job.
- Create workplace health and safety policies and procedures.
- Make sure everyone follows the law and workplace health and safety policies and procedures.
- Do everything reasonable in the circumstances to protect workers from being hurt or getting a work-related illness.

Supervisors must:

- Tell workers about hazards and dangers, and respond to their concerns.
- Show workers how to work safely, and make sure they follow the law and workplace health and safety policies and procedures.
- Make sure workers wear and use the right protective equipment.
- Do everything reasonable in the circumstances to protect workers from being hurt or getting a work-related illness.
